Product Introduction

Wholesale hot sale Factory EPAL Presswood Pallet with low price. Senyu is a EPAL Presswood Pallet manufacturer and supplier in China. To create a lot more value for prospects is our business enterprise philosophy; buyer growing is our working chase for Renewable Design for China Automatic Wooden Pallet Making Machine Sawdust Wood Pallet Tray Making Machine, We put sincere and health as the primary responsibility. We have a qualified international trade group which graduated from America. We're your next business partner. Renewable Design for China Wood Pallet Production Line, Wood Pallet Making Machine, We are seeking the chances to meet all the friends from both at home and abroad for the win-win cooperation. We sincerely hope to have long-term cooperation with all of you on the bases of mutual benefit and common development.

China EPAL Presswood Pallet Suppliers

Product Introduction of EPAL Presswood Pallet

The full name of EPAL Presswood Pallet is plant fiber molded flat industrial pallet. The raw materials used for the pallet are wood shavings, plant stalks, etc. It is an integral structure, and the panel and 9 supporting feet are molded at one time. The surface of the pallet board is flat and smooth, which can meet the transportation of various goods, and the lower surface is equipped with reinforcing ribs. The horizontal and vertical force of the board is balanced, and the nine-leg distribution can meet the four-way insertion of the forklift. It is a flat four-way fork-in single-sided pallet.

Specification of EPAL Presswood Pallet

Material	Recycled Wood
Type	Industry pallet
Entry Type	4-Way
Style	Single Faced
Place of Origin	Shandong, China
Product name	EPAL Presswood Pallet
Weight	17-20kg/pc
Feature	Fumigation Free Pallet

Q: How many pallets can be loaded in one container

A: Because of the nestable design, 1000-1500 pcs EPAL Presswood Pallets can be loaded

How to make the EPAL Presswood Pallet

First the wasted wood was put into the chipping machine and chip it to fine wood chips. The fine wood chips are dried by a dryer, then mixed with thermosetting resin, and placed in a press for compression molding. The entire production process is carried out under high temperature and high pressure to kill any insects and fungi remaining in the wood. At the same time, due to the high density of the wood products produced, it can prevent any other insects from reproducing and re-invading. This kind of molded product is "artificial wooden packaging material" instead of the traditional "solid wood packaging material". Its products no longer need to be treated with insects, and there are no live insects in the products. It meets ISPM15 (International Standard for Phytosanitary Measures 15). The demand for exporting wood packaging products, and after

various service life cycle fatigue tests, can be shipped with the goods to other countries without any special treatment.
